Dental Health Services Library Newsletter

March 2020

From behind the Librarian’s desk

Hello and welcome to the March edition of Dental Health Services Library Newsletter for 2020.

Please visit the online library as I have changed the eBooks display to multiple pages which is displayed in categories from A-Z. I have added pictures, so it is more visual. Hopefully you will like this new format. We also have four new titles of eBooks added this month and in these uncertain times you might find some extra time to earn CPD points. Please also note that I can send out resources to you, so if you would like an item, please let me know we have plenty to choose from.

e-Books New Titles
Infection Control in the Dental Office: A Global Perspective / Louis G DePaola, Leslie E Grant
Pediatric Dentistry: Infancy through Adolescence / Arthur J Nowak
Wilkins’ Clinical Practice of the Dental Hygienist / Linda Boyd; Charlotte Wyche; Lisa Mallonee
Essential Endodontology / Dag Orstavik

Some good news the British Dental Journal is now working correctly, so if you had problems with the January/February issue, please revisit as this technical error has been resolved.

Please stay safe and look out for each other! Don’t forget our book swap if you are looking for something to read!

Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don’t pretend to have the right answers; we stay curious and ask the right questions. We don’t see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don’t avoid difficult conversations and situations; we lean into vulnerability when it’s necessary to do good work.

This text 4th Edition, serves as a quick reference manual for the visual recognition and diagnosis of common bone lesions. Each tabbed section is devoted to a specific diagnostic category and illustrated with images of typical radiographic features.
Detection and assessment of dental caries / Zandona, Andrea Ferreira; Longbottom, Christopher (Editors). Springer Nature Switzerland AG. Cham, Switzerland. 2019. 249 pp. WU 270. 401005081

This book explains how to optimize clinical conditions for detection of the earliest visible signs of dental caries and how best to assess caries activity as a basis for effective management. The available evidence from the literature on detection criteria and methods is distilled and placed in a clinical context to facilitate implementation in clinical practice. Guidance is offered on removal of the dental biofilm and the potential impact of various factors on the performance of different caries detection devices. The histological changes that occur during the caries process and their effect on the clinical appearance of caries lesions are explained. In addition, several caries classification systems based on visual detection criteria and designed to allow staging are presented. Consideration is also given to currently marketed detection aids, including methods involving light fluorescence, transillumination, and radiography. In each case, a summary of the detection performance, based on available supporting evidence, is tabulated together with advice on appropriate clinical application.

This text 5th Edition offers everything you need to succeed in your coursework, at certification, and in clinical practice. No other dental hygiene text incorporates the clinical skills, theory, and evidence-based practice in such an approachable way. All discussions - from foundational concepts to diagnosis to pain management - are presented within the context of a unique client-centered model that takes the entire person into consideration. New to this fifth edition is a much more streamlined approach - one that stays focused on need-to-know information, yet also houses expanded content on things like alternative practice settings, pediatric care, risk assessment, and dental hygiene diagnosis to give you added context when needed. This edition is also filled with new modern illustrations and new clinical photos to augment your learning.

This text 8th Edition incorporates over 1,500 high-quality radiographic images and illustrations to demonstrate core concepts and essential principles and techniques of oral and maxillofacial radiology. The new edition of this bestselling book delivers with state-of-the-art information on oral radiology principles and techniques, and image interpretation. Dental student will gain a solid foundation in radiation physics, radiation biology, and radiation safety and protection before introducing including specialized techniques such as MRI and CT. As well, students will learn how to recognize the key radiographic features of pathologic conditions and interpret radiographs accurately. The 8th edition also includes new chapters on Radiologic Anatomy, Beyond 3D Imaging, and Diseases Affecting the Structure of Bone. A practical guide to using today's technology, this unique text helps your students provide state-of-the-art care!

Dental photography is an increasingly important part of dental care in general practices, hospitals, and specialist clinics. The uses of dental photographs are numerous, such as monitoring treatment outcomes, educating patients, promoting services, and providing evidence for litigation or regulatory purposes. Essentials of Dental Photography is a user-friendly guide to incorporating dental photographs into daily practice. Containing real-world advice and proven techniques, this book helps clinicians understand and apply the fundamental principles of dental photography.
Pediatric restorative dentistry / Leal, Soraya Coelho; Takeshita, Eliana Mitsue (Editors). Springer Nature Switzerland AG. Cham, Switzerland. 2019. 228 pp. WU 480. 401005083
This book describes and discusses the different restorative options for managing carious lesions in children with primary and mixed dentition. The aim is to provide practitioners with thorough, up-to-date information that will improve their clinical practice. The opening chapters present a comprehensive overview regarding diagnosis of carious lesions, risk assessment, child behavior and development, and behavioral management. The importance of oral health promotion and prevention in controlling lesion progression and maintaining oral health is reviewed. The impact of various factors on clinician decision making is then explained in detail, examples including the type of dentition (primary versus permanent), the clinical and radiographic aspect of the dentine carious lesion (noncavitated or cavitated), and whether the lesion is associated with a developmental defect. Guidance is provided on selection of nonoperative versus operative interventions, and the restorative materials most frequently used in pediatric dentistry are fully described, highlighting their advantages and disadvantages.

Healthcare simulation research: a practical guide / Nestel, Debra; Hui, Joshua; Kunkler, Kevin; Scerbo, Mark W; Calhoun, Aaron W (Editors). Springer Nature Switzerland AG. Cham, Switzerland. 2019. 368 pp. W 084.3. 401005088
This book provides readers with a detailed orientation to healthcare simulation research, aiming to provide descriptive and illustrative accounts of healthcare simulation research (HSR). Written by leaders in the field, chapter discussions draw on the experiences of the editors and their international network of research colleagues. This seven-section practical guide begins with an introduction to the field by relaying the key components of HSR. Sections two, three, four, and five then cover various topics relating to research literature, methods for data integration, and qualitative and quantitative approaches. Finally, the book closes with discussions of professional practices in HSR, as well as helpful tips and case studies. Healthcare Simulation Research: A Practical Guide is an indispensable reference for scholars, medical professionals and anyone interested in undertaking HSR.

Toothy and friends / Le, Susana; Illustrated by Camilla Be. Independently Published. USA. 2019. 28 pp. WU 113.6. 401005094
Toothy is introduced to her friends, some which make her feel cheerful while others make her feel gloomy. She learns which friends to depend on to make sure she can keep the smile on her face. Toothy and Friends is a rhyming picture book written by a dentist and illustrated by her seven-year-old daughter. It aims to encourage habits of healthy eating and oral hygiene in a colourful and kid friendly way. For ages: 4-9. About the Author: Susana Le has a passion for teaching young kids all about teeth. She regularly presents to local pre-schools to explain the benefits of healthy eating and good oral hygiene.

Clinical cases in pediatric dentistry / Moursi, Amr M (Editor); Truesdale, Amy L (Associate Editor). John Wiley & Sons, Inc. Hoboken, USA. 2020. 400 pp. WU 480. 401005093
Maintaining the original popular format enjoyed by so many readers, this Second Edition features comprehensive updates to all 66 cases to include the latest diagnostic and treatment techniques. Each chapter also includes brand-new cases, for a total of 13 entirely new cases. The most current references to the literature, best practices, and evidence based clinical guidelines, plus new and updated self-assessment questions with detailed answers and explanations, have been added to all the cases. This second edition maintains the same aim of presenting actual clinical cases to question and educate the reader on pediatric dentistry, using a clear, concise, and consistent format to offer a case history, diagnostics and treatment plans for each case.
Dental Trauma Guide

Dental Trauma Guide access instructions: Select Online Library from DHS home page

Select Books and AV Resources

Select Dental Trauma Guide

Double click on Dental Trauma Guide and it will open.
A selection of library e-Books available via our DHS Online Library site

Please clink on link below for the full list of e-Books available

..\012 GENERAL LIBRARY BUSINESS\005 catalogues\eBook 2020 catalogue.pdf

An "e-Book" or "electronic book" is a digital version of a book. It can be downloaded to a computer, desktop, laptop or Tablet PC or in some cases, to a PDA device. Different readers may be required depending on the e-book format.

How to access an e-Book when off-site.

To download a book title; firstly, enter website via: https://dohlibrary.health.wa.gov.au/dental , then select: Books and AV Resources

Select e-Books from the categories listed - our list of e-books will be displayed.

View the list and select your title. i.e. The Fearful Dental Patient
You will then be asked to login for remote users – HE number and password

**Login for Remote Users**

Please enter your username: 

Please enter your password: 

The e-Book cover will be displayed

![The Fearful Dental Patient cover](image)

**Table of Contents**

- The Fearful Dental Patient: A Guide to Understanding and Managing

Click the title under the Table of Contents i.e. The Fearful Dental Patient.
The e-Book's first page will be displayed

Use the forward and back arrows or the side slide to turn your page or jump pages. (contd. next page)
Your page will be displayed:

Using the side menu, you can print, save or even email pages.
Now available in the Library:

Guillotine (in-house use only)

Spiral Binder (in-house use only)

Projector; Projector screen; Bluetooth speaker; DVD external hard drive (available to borrow)

Intra-Oral photographic mirrors (available to borrow)

Intraoral Mirrors are titanium plated, front surface glass mirrors. Front surface coating ensures that there is no double or "ghost images". Rear surface mirrors give you a reflected image as well as a "ghost image" reflected off the glass. The mirrors reflect the light from the flash to fully illuminate the field being photographed.

The Library book-swap and DVD exchange

Why not try our book-swap service situated in the library? Clean out all those items at work/home taking up space and collecting dust…. send or bring them into us! Next time you pass by the Library have a look at what might catch your eye to swap.

YES…..IT'S YOURS TO BROWSE, MAKE A SELECTION OR SWAP FOR SOMETHING MORE TO YOUR LIKING!
Library cards (no longer distributed):

As part of the electronic library upgrade the library will no longer produce library cards. If you have not registered for the library and would like to, complete the form below and email to us.

Alternatively, if you have registered for the library and do not know your borrowing number contact the library and this will be emailed to you.

Below is the New Borrowers Registration Form, also available on the DHS Website
This book reviews the principles of infection control and the guidelines and standards of care in multiple countries, discussing them within the context of the practice of dentistry. The aim is to enable dental practitioners to ensure that the appropriate measures are adopted for each patient contact, thereby minimizing the risk of transmission of infection - a goal that is becoming ever more important given the threats posed by new or re-emerging infectious diseases and drug-resistant infections. Readers will find information and guidance on all aspects of infection control within the dental office: hand and respiratory hygiene, use of personal protective equipment, safe handling of sharps and safe injection practices, management of occupational exposures, maintenance of dental unit water quality, surface disinfection, and the cleaning and sterilization of dental instruments. Infection Control in the Dental Office will be an invaluable asset for all dental practitioners, including dentists, dental specialists, dental hygienists, and dental assistants.
How can I access the Library electronically at work?

- Open the DHS home page
- Select Library online
- Enter your he number and password
- The Library guide will open
- From the blue menu make your selection

How can I access the Library electronically at home?

- Save this link to your favourites for future use
- Enter your he number and password
- The Library guide will open
- From the blue menu make your selection

How can I borrow a book?

1) Email the Library DHS.Library@health.wa.gov.au with your:
   - 1) **Name:** Julie Jones-Smith
   - 2) **Borrower's card number:** i.e. 101000020
     (Forgotten this number? Email the library)
   - 3) **The item's barcode:** i.e. 601000355

**Barcodes** for all items can be located:

a) Bottom right hand corner of a book,
“How can I borrow a Book” continued….

b) Inside cover of the CD or DVD e.g. 601000355

c) Or using the Online Library catalogue:

Online Library Guide, Print Books & A/V Resources

- Scroll down to Select your catalogue

- Select the PDF catalogue you wish to open
- Select your title
- Copy this information into an email
Audio-Visual Resources

This link will include all the library audio visual resources available in one PDF document.

\[012\_GENERAL\_LIBRARY\_BUSINESS\_005\_catalogues\_Audio\_visual\_collection\_2019.pdf\]

To loan simply email the library with your borrowers’ number and the call number of the audio-visual item you wish to loan.

The resource will be sent to you by return mail including return postage instructions and packaging.
MIMS, Therapeutic Guidelines and Australian Medicines Handbook and the Australian Schedule of Dental Services and Glossary

The paper format of MIMS is no longer available to staff. However, the online version is available via the Library online under Drug Information. Also available are the Therapeutic Guidelines and the Australian Medicines handbook.

Under Mobile Resources, you can also purchase MIMS for your smartphone from MIMS.

Want an even faster Drug Reference access point without having to access the Library site?
Mobile access

What is a mobile site?
A mobile (web) site has been optimised for viewing by a mobile device. It usually has a "stripped down" appearance to make it quicker to download and easier to view on a smaller screen. Mobile sites can be accessed from any mobile web browser regardless of the type of device.

What is a mobile resource?
A mobile resource is any resource such as a journal database or point-of-care tool that can be accessed by a mobile device. The resource may or may not have been optimised for viewing on your mobile platform as it may be device or operating system dependent - for example, a resource may be available only as an iPhone app.

This guide is designed to provide an introduction to WA DoH library content, resources and applications that can be accessed using mobile devices such as PDAs, Palm Pilots, Blackberrys and iPads/iPhones.
For the most part, mobile devices that support web browsing can be used to access online library resources, however some have special features that make viewing easier on a portable device.

Important notes:
For technical information and support for your mobile device please consult your manual. Mobile access is not free access. While some products include mobile access as part of the Library’s ongoing subscription, some products such as MIMS, will require additional individual expense to enable mobile access.
All internet-enabled devices can access the library pages and resources, but not all resources are optimised for viewing on a mobile device and some of the features may not be available via your mobile device.
Some resource links will send you directly to a specially developed mobile site, while others will send you to applications to download.
Subscription resources often require that you first register yourself and/or your device.

Remember you can also purchase MIMS for your smart phone.
