Dental Health Services Library Newsletter

May 2020

From behind the Librarian’s desk

Hello and welcome to the May edition of Dental Health Services Library Newsletter for 2020.

I am very pleased to inform you that the Library has re-opened for all staff. The following access and procedures for the Library will apply:

- The library will be open on Monday, Wednesday & Friday from 7.30am to 4pm. It will be locked at all other times including lunch and morning tea break on the days it is open.

- The library is available for study or reading but numbers and seating has been reduced to comply with physical distancing 1.5m rules.

- Please email the library on DHS.Library@health.wa.gov.au with your request and you will be notified when your loan has been sent or ready for collection.

- The library will quarantine and clean all books upon return.

- A return chute is located outside of the library if it is closed. There is also a return box inside the library door if it is open.

- Anyone entering the library is asked to make use of the hand sanitiser before entering and sign the library register located near the entrance.

- Please remember to keep your library books clean and in a safe place until you return them.

Finally, I have found a gem of a read and would recommend Kimberley Cool by Dentist Mick Powell published in 1988 and set in 1965 where he provided urgently needed dental services in the Kimberley.

Sophie
A/Library Administration Officer

This updated tenth edition of this text provides a detailed overview of all the important concepts traditionally covered in a research methods class. It covers the principles of both qualitative and quantitative research, and how to interpret statistics without computations, so is suitable for all students regardless of their math background. The book is organized so that each concept is treated independently and can be used in any order without resulting in gaps in knowledge-allowing it to be easily and precisely adapted to any course.

This text presents evidence-based research on the topic and provides assessments of diagnostic devices. It offers new insights into how a dentine carious cavity can be managed by either tissue removal or restoration. Methods for preserving dental tissue are presented and ample evidence highlights the need to seal with a quality restorative material. An update on how to conduct a randomized clinical trial is followed by a chapter on agreed upon terminology for supporting improved communication among oral health professionals around the world. This is a must-read for general practitioners, restorative specialists, dental students, and oral hygienists/therapists.
Wheeler's dental anatomy, physiology & occlusion / Nelson, Stanley J.

Updated and visually enhanced, the eleventh edition of this market-leading dental text expands its focus on clinical applications and includes dozens of online 360-degree and 3-D tooth animations to give you an unparalleled view of dentitions, pulp formation, the sequence of eruptions, and countless clinical considerations. Every text purchase also comes with access to the companion ExpertConsult website - where you can reference the entire text electronically as well as engage with a wealth of learning activities, animations, and hands-on resources to better understand and retain the information covered in your text. In all, this proven learning package offers all the up-to-date information, best practices, and tools to prepare you for the dental anatomy and occlusion section of the exams and ensure long-term clinical success.

The single-tooth implant: A minimally invasive approach for anterior and posterior extraction sockets / Tarnow, Dennis P; Chu, Stephen J.
Quintessence Publishing Co, Inc. USA. 2020. 230 pp. WU 640. 401005106

The replacement of the single tooth with a dental implant is one of the most common clinical situations practitioners face on a daily basis. While in the past sockets were left untouched for months after tooth extraction before attending to the residual ridge, today it is possible to perform one surgery, one time, which is a huge benefit to both the patient and clinician alike. Written by two world-class masters, this book begins with a discussion of the history and rationale for anterior and posterior single-tooth implants, and then it walks the reader through the three types of sockets-type 1, type 2, and type 3-and their various indications and limitations.

Dental fear and anxiety in pediatric patients: Practical strategies to help children cope / Campbell, Caroline (Editor).
Springer International Publishing AG. Cham, Switzerland. 2017. 252 pp. WU 480. 401005102

This book is a comprehensive guide to pediatric dental fear/anxiety (DFA) and phobia that will provide practitioners with a full understanding of the etiology, prevalence, assessment, and management of these conditions. The coping styles of children when under stress are explored, with discussion of their relevance to the assessment visit and treatment allocation. Practical treatment techniques are comprehensively covered, from non-pharmacological behavioral strategies relevant for children with no or mild DFA to those approaches more appropriate for children with severe DFA/phobia. The importance of the use of language and communication skills to build rapport and allay anxiety is explored. Relaxation and hypnosis techniques are described, with guidance on how to introduce these to patients and their parents/caregivers. Techniques that help children cope when receiving injections are detailed, including systematic needle desensitization.

Dentistry and the pregnant patient / Ninan, Daniel.

To err on the side of caution, some dentists may hesitate to perform necessary procedures on pregnant patients. However, good oral health is essential to a healthy pregnancy and can help reduce prenatal complications, including preterm delivery and fetal loss. This book serves as an easy-to-use guide to help dentists of all specialties provide safe, effective care for their patients during pregnancy. The book is broken down into chapters on general treatment guidelines, pregnancy-related conditions in each organ system that may impact care, and the safety of the use of common dental drugs, including anesthetics, during pregnancy.
Dental ethics at chairside: Professional obligations and practical applications / Ozar, David T; Sokol, David J; Patthoff, Donald E. Georgetown University Press. Washington, DC. 2018. 358 pp. WU 050. 401005107

In the last two decades, more than ever before dentists must determine how to properly maintain their focus on ethics and professionalism in the face of powerful commercial pressures. While there is encouragement for ethical conduct within the dental profession, there is still relatively little assistance available to dentists and dental students for judging what conduct is ethically best in concrete situations. For many years, Dental Ethics at Chairside has served as an invaluable resource for tens of thousands of dentists and dentistry students, and this third edition of the gold standard in the field is thoroughly revised and updated.

The impact of nutrition and diet on oral health / Zohoori, F.V; Duckworth, R.M (Editors). S. Karger AG. Switzerland. 2020. 152 pp. WU 113.7. 401005110

Most oral diseases are preventable, yet they remain the most globally common noncommunicable disorders, affecting people throughout their lifetime. Lifestyle, including diet and food choice, is central to the occurrence of oral disease. Nutrition and diet can impact the development and status of the oral cavity as well as the progression of illness. Also, poor oral health can influence the ability to eat and, consequently, to maintain an adequate diet and nutrient balance. This book, consisting of 14 chapters, provides current information on the impact of nutrients (macro- and micro-elements and vitamins) and diet on oral health and vice versa (i.e., the impact of oral health on diet/nutrition). It also reviews possible oral health effects of probiotics as well as relationships between genotype and diet, which are important for determining oral disease risk. This book is a helpful resource for undergraduate and postgraduate students. It will also be useful to dentists and nutritionists/dietitians as they integrate nutrition education into medical practice.

This book provides the theoretical knowledge required by students when learning how to diagnose oral diseases, plan treatment, and perform various types of dental restoration. It is also useful for clinicians wishing to update their treatment skills and broaden their understanding operative dentistry. Adopting an evidence-based approach, and in accordance with the philosophy of minimally invasive dentistry, it explains in detail the use of both classic and new restorative materials in various clinical situations. It also discusses the principles of smile analysis, as well as the techniques for esthetic composite restorations on posterior and anterior teeth, including direct and indirect veneers.

Practical procedures in the management of tooth wear / Banerji, Subir; Mehta, Shamir; Opdam, Niek; Loomans, Bas. John Wiley & Sons. USA. 2020. 231 pp. WU 166. 401005113

This book summarises the key points of each procedure, complete with clinical photographs. Chapters outline the principles and procedures for each technique, offer clinical tips and advice, and include full references. Topics include patient assessment and diagnosis, treatment planning for localised and generalised tooth wear, the partially dentate patient, tooth wear monitoring, management, and maintenance.
Dental Trauma Guide access instructions: Select Online Library from DHS home page

Select Books and AV Resources

Select Dental Trauma Guide

Double click on Dental Trauma Guide and it will open.
eBooks

A selection of library eBooks available via our DHS Online Library site

Please clink on link below for the full list of eBooks available

..\012 GENERAL LIBRARY BUSINESS\005 catalogues\eBook 2020 catalogue.pdf

An “eBook” or “electronic book” is a digital version of a book. It can be downloaded to a computer, desktop, laptop or Tablet PC or in some cases, to a PDA device. Different readers may be required depending on the e-book format.

How to access an eBook when off-site.

To download a book title; firstly, enter website via: https://dohlibrary.health.wa.gov.au/dental, then select: Books and AV Resources

Select eBooks from the categories listed - our list of e-books will be displayed.

View the list and select your title. i.e. The Fearful Dental Patient
eBooks cont.

You will then be asked to login for remote users – HE number and password

Login for Remote Users

Please enter your password: 

The eBook cover will be displayed

Click the title under the Table of Contents i.e. The Fearful Dental Patient.
The eBook’s first page will be displayed

Use the forward and back arrows or the side slide to turn your page or jump pages. (contd. next page)
Your page will be displayed:

Using the side menu, you can print, save or even email pages.
Now available in the Library:

Guillotine (in-house use only)

Spiral Binder (in-house use only)

Projector; Projector screen; Bluetooth speaker; DVD external hard drive (available to borrow)

Intra-Oral photographic mirrors (available to borrow)

Intraoral Mirrors are titanium plated, front surface glass mirrors. Front surface coating ensures that there is no double or "ghost images". Rear surface mirrors give you a reflected image as well as a "ghost image" reflected off the glass. The mirrors reflect the light from the flash to fully illuminate the field being photographed.

The Library book-swap and DVD exchange

Why not try our book-swap service situated in the library? Clean out all those items at work/home taking up space and collecting dust…. send or bring them into us! Next time you pass by the Library have a look at what might catch your eye to swap.

YES…..IT'S YOURS TO BROWSE, MAKE A SELECTION OR SWAP FOR SOMETHING MORE TO YOUR LIKING!
Library cards (no longer distributed):

As part of the electronic library upgrade the library will no longer produce library cards. If you have not registered for the library and would like to, complete the form below and email to us.

Alternatively, if you have registered for the library and do not know your borrowing number contact the library and this will be emailed to you.

Below is the New Borrowers Registration Form, also available on the DHS Website

This clinical handbook is a complete guide to the use of nitrous oxide when performing dental procedures in children. Nitrous oxide offers the easiest and safest form of pharmacological behavior management in this age group and can help greatly in reducing fear and anxiety toward dentists and dental treatment. Importantly, its use in children differs from that in adults, owing in part to the need for appropriate behavior management skills. In considering a range of clinical scenarios in which nitrous oxide is of value, this book will support clinicians in their daily practice. All aspects are covered, including rationale, basic science, mechanism of action, equipment, scavenging systems, technique, monitoring, safety, toxicity, documentation, and team building. Guidance is also provided on the use of nitrous oxide in special pediatric populations requiring oral health care.

Library feedback

Do you have a suggestion for library purchases or any other information that would benefit the service to all library users?

Email us on  DHS.Library@health.wa.gov.au

We would really appreciate your input into your library.
How can I access the Library electronically at work?

- Open the DHS home page
- Select Library online
- Enter your he number and password
- The Library guide will open
- From the blue menu make your selection

How can I access the Library electronically at home?

- Save this link to your favourites for future use
- Enter your he number and password
- The Library guide will open
- From the blue menu make your selection

How can I borrow a book?

1) Email the Library DHS.Library@health.wa.gov.au with your:

   1) **Name:** Julie Jones-Smith

   2) **Borrower's card number:** i.e. 101000020
      (Forgotten this number? Email the library)

   3) **The item's barcode:** i.e. 601000355

**Barcodes** for all items can be located:

   a) Bottom right hand corner of a book,
“How can I borrow a Book” continued….

b) Inside cover of the CD or DVD e.g. 601000355

c) Or using the Online Library catalogue:

- Scroll down to Select your catalogue
- Select the PDF catalogue you wish to open
- Select your title
- Copy this information into an email
Audio-Visual Resources

This link will include all the library audio visual resources available in one PDF document.

\012 GENERAL LIBRARY BUSINESS\005 catalogues\Audio visual collection 2019.pdf

To loan simply email the library with your borrowers’ number and the call number of the audio-visual item you wish to loan.

The resource will be sent to you by return mail including return postage instructions and packaging.
The paper format of MIMS is no longer available to staff. However, the online version is available via the Library online under Drug Information. Also available are the Therapeutic Guidelines and the Australian Medicines handbook. Under Mobile Resources, you can also purchase MIMS for your smartphone from MIMS.

Want an even faster Drug Reference access point without having to access the Library site?
Mobile access

What is a mobile site?
A mobile (web) site has been optimised for viewing by a mobile device. It usually has a "stripped down" appearance to make it quicker to download and easier to view on a smaller screen. Mobile sites can be accessed from any mobile web browser regardless of the type of device.

What is a mobile resource?
A mobile resource is any resource such as a journal database or point-of-care tool that can be accessed by a mobile device. The resource may or may not have been optimised for viewing on your mobile platform as it may be device or operating system dependent - for example, a resource may be available only as an iPhone app.

This guide is designed to provide an introduction to WA DoH library content, resources and applications that can be accessed using mobile devices such as PDAs, Palm Pilots, Blackberrys and iPads/iPhones.
For the most part, mobile devices that support web browsing can be used to access online library resources, however some have special features that make viewing easier on a portable device.

Important notes:
For technical information and support for your mobile device please consult your manual. Mobile access is not free access. While some products include mobile access as part of the Library’s ongoing subscription, some products such as MIMS, will require additional individual expense to enable mobile access.
All internet-enabled devices can access the library pages and resources, but not all resources are optimised for viewing on a mobile device and some of the features may not be available via your mobile device.
Some resource links will send you directly to a specially developed mobile site, while others will send you to applications to download.
Subscription resources often require that you first register yourself and/or your device.

Remember you can also purchase MIMS for your smart phone.
